

INFORMATION TECHNOLOGY INTERNSHIPS – Infrastructure & Applications

The company

UCT is a global, vertically integrated outsource manufacturing provider of broad-based manufacturing capabilities – from precision components to large scale systems.

Our goal is to deliver technology, manufacturing, and business value to our customers and strive for price performance advantage with fast response times. Our global, vertically integrated facilities align customer needs with local capabilities – offering the responsiveness, flexibility, and agility of a local company combined with the expertise and financial strengths of an experienced global manufacturing solutions provider.

From design assistance and prototype development to production and testing, a partnership with UCT can help customers bring products and new product innovations to market faster, improve the efficiency of their supply chain and materials management, and increase their performance.

No matter where a company is around the world, UCT can deliver the manufacturing solutions needed to gain a competitive edge.

Internships
